HOW TO MEASURE

This important task requires a lot of precision: therefore we recommend you to pay attention to the following instructions and to follow carefully the procedure described below:

- take the measure you need with the help of another person;
- use the appropriate tailor's soft tape measure;
- all measures must be taken to the body; the person must be undressed or in underwear;
- during the different stage be careful not to turn the tape accidentally and not to take the measure neither too tight nor too loose;
- for measures 5-6-7-11, tie a ribbon (as reference point) round the waist (at navel level).

1	Turn 1 chest circumference	raise your arms horizontally, pass the tape measure under your underarms at the chest level, lower them and measure
2	Turn 2 waist circumference	tie the tape round the waist at the navel level
3	Turn 3 hips circumference	tie the tape round the hips at about 19-20 cm below the waist, being careful not to over tighten
4	Turn 4 tigh circumference	tie the tape round the thigh at the point of widest diameter
5	AB distance neck-waist	measure along the spine, putting the tape on the most prominent vertebra at the base of the neck until the ribbon round the waist
6	BC distance waist-hips	measure along the spine the distance between the ribbon tied round the waist and the hips
7	AC distance neck-hips	it's the sum of the previous measures (AB and BC)
8	DE shoulders	measure the distance between the two extremities of the high curves of the shoulders, from the backside of the person (usually the measure of the shoulders is nearly equivalent to the AB distance (neck-waist))
9	GI sleeve length	raise the arm, bend it to L in front of the chest and measure the distance from the bone of the soulder to the wrist, passing from the elbow
10	DL distance shoulder-neck	from his/her side measure the length from the high curve of the shoulder to the base of the neck
11	MN distance waist-knee	measure from his/her side starting from the ribbon round the waist till below the knee
12	OP distance crotch-knee	measure from the center of the crotch till below the knee
